

CLAIMS

What Is Claim d Is:

1. A water sinker toy comprised of;
a head made from a material having sufficient weight to enable the water
5 sinker toy to sink in water;
a tail portion having a plurality of elements made from floatable material
to provide the water sinker toy with buoyancy;
the head having an opening formed therein to create an adjustable ring;
and
10 the plurality of elements being removably secured in the head and being
formed as tentacles to simulate a squid-like toy.
2. The water sinker toy of claim 1 wherein the head and the opening are
approximately oval in shape with the head having a shaped outer end, away
15 from the tail portion.
3. The water sinker toy of claim 2 wherein the head has a larger inner end
with the plurality of elongated members removably secured to the larger inner
end.
20
4. The water sinker toy of claim 3 wherein the plurality of elongated
members are removably secured in apertures formed in the larger inner end.
5. The water sinker toy of claim 4 wherein the outer end of the head
25 includes a space that can be opened for adjustment of the size of the
adjustable ring.

6. The water sinker toy of claim 5 wherein the head is made from a material selected from the group of hard rubber, light metal or plastic and the elongated members are made from a material selected from the group of silicone, rubber, or an equivalent plastic.

5

7. The water sinker toy of claim 6 wherein there are between 6 to 52 elongated members.

8. The water sinker toy of claim 7 wherein the elongated members are both
10 substantially circular and oval shaped and between about 4 ¼" and 4 ⅝" in length; and the elongated members taper from approximately 1/4" in diameter where they are connected in the larger inner end of the head, to rounded outer tips of about 1/8" in diameter.

15 9. The water sinker toy of claim 6 wherein there are between 12 to 25 elongated members.

10. The water sinker toy of claim 9 wherein the elongated members are
20 substantially circular and oval shaped and between about 4 ¼" and 4 ⅝" in length; and the elongated members taper from approximately 1/4" in diameter where they are connected in the inner end of the head, to rounded outer tips of about 1/8" in diameter.

11. The water sinker toy of claim 1 wherein the outer end of the head
25 includes a space that can be opened for adjustment of the size of the adjustable ring.

12. The water sinker toy of claim 11 wherein the head and the opening are approximately oval in shape with the head having an outer end, away from the tail portion, that has a ballistic-shape, and wherein the head has a larger inner end with the plurality of elongated members removably secured in apertures
5 formed in the larger inner end.

13. The water sinker toy of claim 12 wherein the head is made from a material selected from the group of hard rubber, light metal or plastic and the elongated members are made from a material selected from the group of
10 silicone, rubber, or an equivalent plastic; and wherein there are between 6 to 52 elongated members, which elongated members are tapered.

14. The water sinker toy of claim 13 wherein the elongated members are substantially circular and oval in shape and between about 4 1/4" and 4 5/8" in
15 length and taper from approximately 1/4" in diameter where they are connected in the inner end of the head, to rounded outer tips of about 1/8" in diameter.

15. A water sinker toy comprised of;
20 a substantially oval head having a shaped outer end with and a larger uneven inner end; the substantially oval head being made from a material having sufficient weight to enable the water sinker toy to sink in water;
a tail portion having a plurality of elements in the shape of tentacles, made from floatable material to provide the water sinker toy with buoyancy;
25 the substantially oval head having a substantially oval opening formed therein to create a ring and the outer end having a space that can be opened for adjustment of the size of the ring.; and
the plurality of elements being removably secured in apertures formed in the larger uneven inner end of the head to simulate a squid-like toy.

16. The water sinker toy of claim 15 wherein the substantially oval head is made from a material selected from the group of hard rubber, light metal or plastic and the elongated members are made from a material selected from the group of silicone, rubber, or an equivalent plastic.

5

17. The water sinker toy of claim 16 wherein there are between 6 to 52 elongated members.

10 18. The water sinker toy of claim 17 wherein the elongated members are substantially circular and oval in shape and between about 4 ¼" and 4 ⅝" in length; the elongated members tapering from approximately 1/4" in diameter where they are connected in the larger uneven inner end of the head, to rounded outer tips of about 1/8" in diameter.

15 19. The water sinker toy of claim 16 wherein there are between 12 to 25 elongated members.

20 20. The water sinker toy of claim 19 wherein the elongated members are substantially circular and oval in shape and between about 4 ¼" and 4 ⅝" in length; the elongated members tapering from approximately 1/4" in diameter where they are connected in the larger uneven inner end of the head, to rounded outer tips of about 1/8" in diameter.
